

AutoVue DigEPlan : Installation Guide

5.8.8. Direct execution of the Batch Stamp functionality:

The Batch Stamping functionality can be called from the Standard DigEplan application, but it is also possible to generate a URL to call the functionality directly. This would for example allow a stamp to be added to a document automatically based on a CORSA Case workflow trigger.

The URL needs to be generated using the properties detailed in the following table:

Property	Example Value	Mandatory or optional	Description
Web Service application path	http://autovue_server:8088/av_con/vue/Call_LCT_CO_RSA_WS.jsp?	Mandatory	Substitute autovue_server with the hostname of the AutoVue server
Web Service method ID	<code>&method=7&gv_URL=STAMP </code>	Mandatory	For the Batch Stamp module always use the constant value <code>&method=7&gv_URL=STAMP </code>
Document id	A12.03157	Mandatory	
;Version	1	Mandatory	
;Connection ID (constant value) : CORSA username : CORSA user password	WebService:autovue:password	Mandatory	Connection string, comprised of three elements, a constant WebService the username of the CORSA account that should be used to add the Stamp and the password of the CORSA user account
;Stamp=	;Stamp=Wabo	Mandatory	Name of the AutoVue Stamp
;PROP_Case_ID=	;PROP_Case_ID=WB12/0174	Optional	Case ID, pass this property if it is specified as a field in the AutoVue or is required by any other stamp fields that require the Case ID
;PROP_Permit_doc_ID=	;PROP_Permit_doc_ID=ABC12345	Optional	Permit date of the document in CORSA, pass this if the property if it is specified as a field in the AutoVue Stamp
;PROP_OLO_num=	;PROP_OLO_num=123456	Optional	OLO number of the document in CORSA, pass this if the property if it is specified as a field in the AutoVue Stamp
;PROP_Permit_Date=	;PROP_Permit_Date=29/06/2012	Optional	Permit Date of the document in CORSA, pass this if the property if it is specified as a field in the AutoVue Stamp
;PROP_CORSA_Name=	;PROP_CORSA_Name=Building Drawing	Optional	Name / subject of the document in CORSA, pass this if the property if it is specified as a field in the AutoVue Stamp
;USER_Dossier	;USER_Dossier=Wabo	Optional	Customer defined stamp field, the value is specified as part of the URL

AutoVue DigEPlan : Installation Guide

The following example URL shows the minimum set of properties required by the Batch Stamp module. This would assume that the stamp contains only fields whose values can be retrieved based on the document ID or from the system, eg today's date

http://autovue_server:8088/av_con/jvue/Call_LCT_CORSA_WS.jsp?&method=7&gv_URL=S_TAMP|A12.03157;1;WebService:username:password;STAMP=Wabo

The following example URL shows a comprehensive set of properties, where optional parameters have been passed to be included in the Stamp.

http://autovue_server:8088/av_con/jvue/Call_LCT_CORSA_WS.jsp?&method=7&gv_URL=S_TAMP|A12.03157;1;WebService:username:password;STAMP=Wabo;PROP_Case_ID=WB12/0174;PROP_Permit_doc_ID=ABC12345;PROP_OLO_num=123456;PROP_Permit_Date=29/06/2012;PROP_CORSA_Name=Building Drawing;USER_Dossier=Wabo;USER_NAAM=Example

The results of the call are displayed in a browser window.

5.8.9. Direct execution of the Batch PDF/A Conversion:

The PDF/A Conversion functionality can be called from the Standard DigEplan application, but it is also possible to generate a URL to call the functionality directly. This would for example allow a PDF/A rendition document to be generated automatically based on a CORSA Case workflow trigger.

The URL needs to be generated using the properties detailed in the following table:

Property	Example Value	Mandatory or optional	Description
Web Service application path	http://autovue_server:8088/av_con/jvue/Call_LCT_CORSA_WS.jsp?	Mandatory	Substitute autovue_server with the hostname of the AutoVue server
Web Service method ID	&method=2&gv_URL=	Mandatory	For the Batch Stamp module always use the constant value &method=2&gv_URL=
Document id	A12.03157	Mandatory	
:Version	1	Mandatory	
:Connection ID (constant value) : CORSA username : CORSA user password	WebService:autovue:password	Mandatory	Connection string, comprised of three elements, a constant WebService the username of the CORSA account that should be used to add the Stamp and the password of the CORSA user account

The following example URL shows the minimum set of properties required by the Batch PDF/A module.

http://autovue_server:8088/av_con/jvue/Call_LCT_CORSA_WS.jsp?&method=2&gv_URL=A12.03157;1;WebService:autovue:password
